

The Finest Fords of a Lifetime

60

FORDS

GALAXIES • FAIRLANES • STARLINER • SUNLINER

1960 brings a wonderful new world of FORDS

Inside this catalog you'll see the Finest Fords of a Lifetime! Economy-minded Fairlanes. Big-value Fairlane 500's. Elegant Galaxies. A breath-taking new Sunliner convertible and a brand-new hardtop model, the flashing Starliner.

A wonderful new world of style. There is a world of difference in the styling of these 1960 Fords. New hood contours are gracefully sloping to let you see better what's ahead. The Thunderbird-inspired roof protects you from broiling sun. This is *practical* styling combined with fine-car elegance.

A wonderful new world of performance. For the man of action, there are "hot and easy" new Thunderbird Special V-8's that blend blazing power with kid-glove smoothness. For the thrifty man, there's a new economy V-8 that gives even Ford's Mileage Maker Six a run for its money.

A wonderful new world of ride. You get a brand-new grip on any road with Ford's new Wide-Tread Design that gives you a full 5-foot tread. And leaf springs now 5 feet long have been designed into Ford's new rear suspension. Result: a car that moves like the Thunderbird, corners like the Thunderbird, rides like the Thunderbird—at low Ford prices!

From any Point of View . . . from every Point of Value . . . truly these are the Finest Fords of a Lifetime!

Queen of the hardtops *Galaxie* Town Victoria

You get all the verve of a convertible, all the convenience of a 4-door, 6-passenger sedan in this glamorous Galaxie hardtop. With its Thunderbird-inspired roof that protects you from sun glare and heat . . . its vast picture-window views . . . its Thunderbird power and handling ease . . . here's all the automobile *anyone* could ask for! In fact, this beautiful Galaxie makes it unnecessary to pay more for *fine car elegance*.

BUILT FOR PEOPLE . . .

A Wonderful New World of Luxurious Comfort

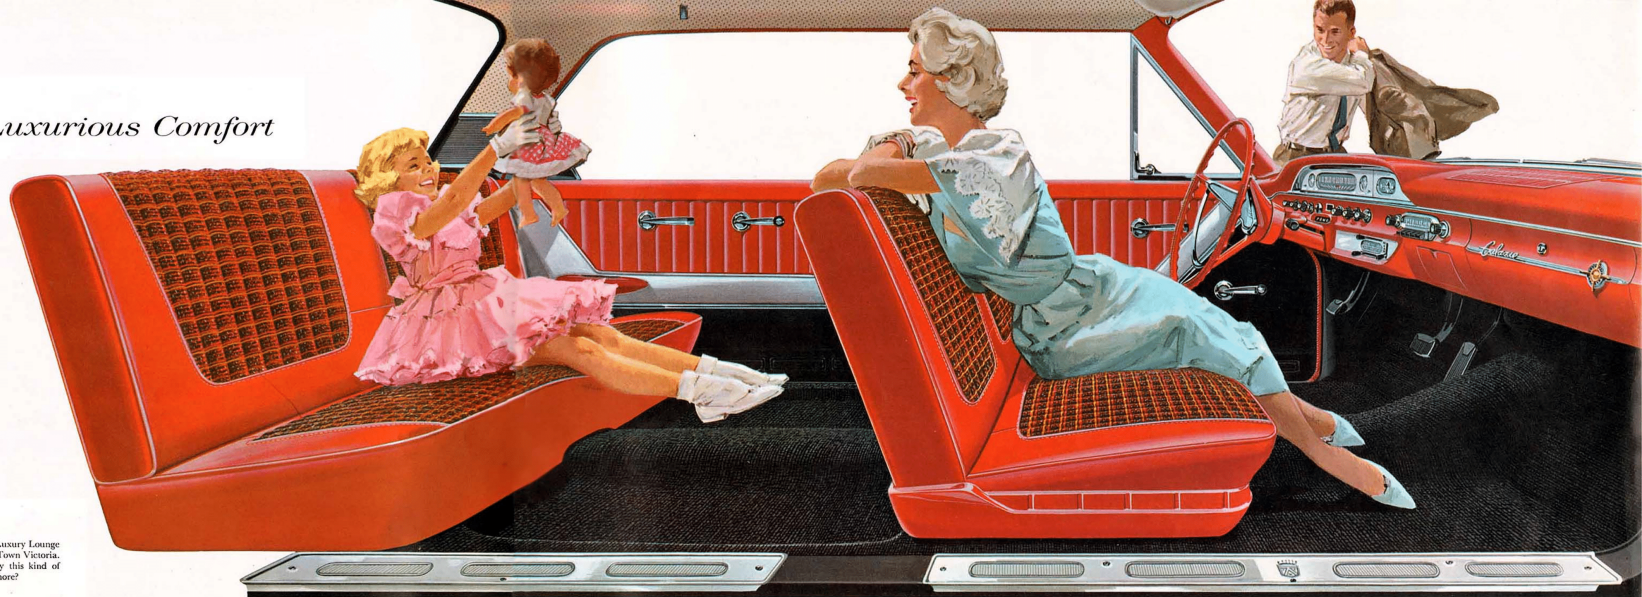

With all of its emphasis on elegant lines, the 1960 Fords have *not* sacrificed passenger comfort to achieve their beauty. In the Finest Fords of a Lifetime *six* big people—including the man in the middle—ride in greater comfort than ever. The new Fords give you nearly half-a-foot more shoulder room, more knee room, more hip room. Chair-high seats mean extra comfort, extra leg room. The “doglegs”—windshield supports that interfere with getting in and out of the front seat—have been eliminated in the 1960 Fords for your greater convenience.

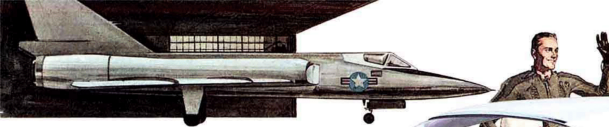

As you step inside a 1960 Galaxie, for example, notice how your feet sink into the deep-pile 100% rayon Luxury Loom carpeting. Notice how you sit posture-perfect in

comfortably padded seats (foam padding does not cost you extra in a Ford). And the cushioned comfort extends the *full width* of the seats, too (no hard spots in the center)!

Now that you're seated comfortably, you can admire the luxury that surrounds you. For these are no ordinary car interiors . . . these are the finest, richest, most luxurious interiors ever seen in Ford's price class! Sofa-soft seats are covered with long-wearing upholsteries of exclusive nylon fabrics and sof-textured vinyl trim. Colors are blended harmoniously to please the most color-sensitive eyes. And in most models there's a smart touch of bright metal in each door and quarter panel. *Truly, you travel in the lap of luxury when you travel in a 1960 Ford!*

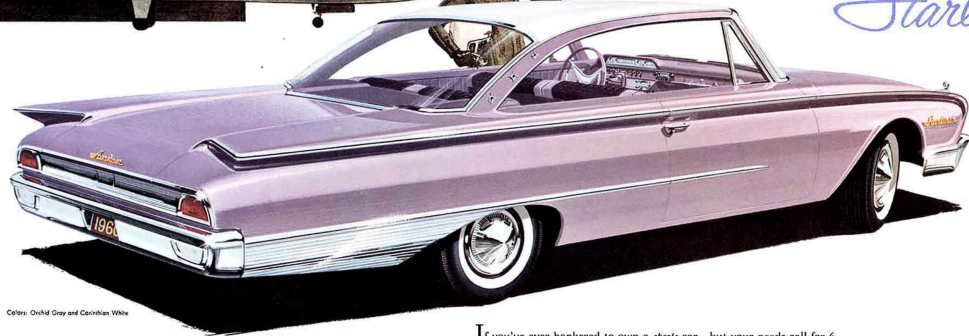

At the right is the color-keyed Luxury Lounge interior of a 1960 Ford Galaxie Town Victoria. When low Ford prices can buy this kind of elegance and luxury, why pay more?

A Wonderful New World of Power Expressed in motion

Starliner and Sunliner

Colors: Orchid Gray and Corinthian White

If you've ever hankered to own a *sports* car—but your needs call for 6-passenger room—you'll know at first glance that this dashing, all-new Starliner was created for *you*! As your eyes drink in the beauty of this jaunty 2-door hardtop, you'll realize, too, that here is a beautifully proportioned motor car. Its flowing, swept-back lines give the Starliner a racy appearance that is daringly different, unmatched by any other full-sized car on the American Road today. And it's a car primed for *action*. Most Starliners are equipped with the optional Thunderbird 352 *Special* V-8 engine that gives you power as you like it . . . when you need it!

1960 Ford Sunliner with top up. Shown here in Corinthian White with black satin-grain vinyl top.

Color: Montecarlo Red

Here's a brand-new edition of the best-selling convertible of all time—the Ford Sunliner! Its sun-loving, fun-loving new proportions are a beauty to behold. And there's lively power to match the Sunliner's breezy looks. Most are equipped with the Thunderbird 352 *Special* V-8, the very same engine that propels the mighty Thunderbird itself. Hills surrender on sight! And notice the sleek-tailored new vinyl top. It not only stays brighter and cleans easier than others, but it folds down *completely flush* with the rear deck!

Wonderful New World of Elegance *Galaxie* Town and Club Sedans

Here are two of the most elegant, roomiest cars you've ever seen: 2-door and 4-door Galaxie sedans by Ford! Both of these cars provide unmatched comfort and leg room for *six* big adults. There's stretch-out room galore . . . and room for your hat, too. Under your feet is thick 100% rayon Luxury Loom carpeting. You'll be surrounded by the elegance of Ford's color-keyed Luxury Lounge interiors, now more beautiful than ever. You'll even be *seated* more comfortably in Ford's posture-perfect, chair-high seats!

Color: Meadowlark Green

When it comes to getting in or out easily, no other car even comes close to the 4-door Galaxie Sedan with its big, wide-opening doors. As for safety, these cars, like all 1960 Fords, give you new *Truck Size brakes* with brake linings 25% bigger, the largest in Ford's field. The whole body is based on Ford's new *Wide-Contoured frame*. This new frame—25% stronger than ever before—gives the passenger compartment all-around protection other cars cannot even begin to match.

Galaxie Town Sedan (above) offers a big bonus of built-for-people comfort to all six passengers with its *four* wide-opening doors. Note the *thin* center pillar that gives this model the open look of a hardtop. When low Ford prices buy this kind of Thunderbird elegance, why pay high prices?

Luxury surrounds you (right) when you ride in a 1960 Ford. Yet Ford is designed with your comfort and safety in mind, too. You get up to 31% more total safety glass but *not* up into the roof where it invites discomfort from overhead sun glare and heat.

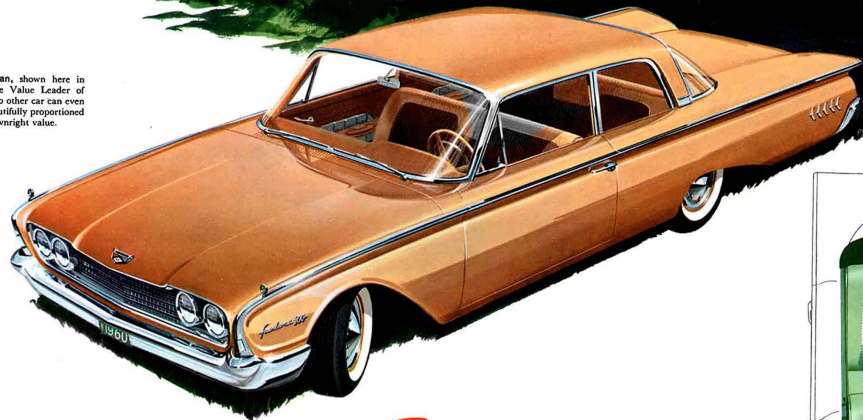

Galaxie Club Sedan (right) brings you Thunderbird styling in a 6-passenger 2-door designed for business or family use. One glance tells you that this luxurious Ford is every inch a beautiful automobile, one you'll park with equal pride at the friendly corner store or swank Country Club. Like all 1960 Fords, it has the Thunderbird's *5-foot tread* to give you that Thunderbird *feel* behind the wheel!

Color: Yosemite Yellow

Fairlane 500 Club Sedan, shown here in Beachwood Brown, is the Value Leader of 2-door models for 1960. No other car can even come close to this big, beautifully proportioned Ford when it comes to downright value.

Big Car Luxury at Ford's low price

You won't believe your eyes when you read the price tag on these beautiful Fairlane 500 sedans for 1960. Glamour and luxury have *never* been so low priced! Without question, these cars offer the greatest dollar value in cars today. Despite their low price, these Fairlane 500's bring you the *same* big six-passenger interiors and advanced features of

Fairlane 500 Sedans

other 1960 Fords. You get the *same* Truck Size brakes . . . the *same* Wide-Tread Design . . . the *same* Thunderbird power . . . the *same* classic styling . . . the *same* low operating costs for which Ford is famous. From any Point of View . . . from every Point of Value . . . these cars are indeed the Value Leaders of the entire automotive industry for 1960. Drive one!

Fairlane 500 Town Sedan, shown here in Aquamarine and Corinthian White, is the Value Leader of 4-door models for 1960. It's easy to pay a lot more money for a car . . . but it's impossible to find one that gives you so *much* for your money!

To the left you see one of four color-keyed Luxury Lounge interiors which you may choose in your 1960 Fairlane 500! Upholstery shown is green modern-stripe nylon cloth with morocco-grain vinyl bolster. Like all Ford interior materials, these have passed the most *rigid* tests in Ford's own laboratories. In the field of fashion the word "Ford" has long meant a "hit" —and it's true again in 1960!

Wonderful New Economy in the beautiful *Fairlane* Town Sedan/Club Sedan/Business Sedan

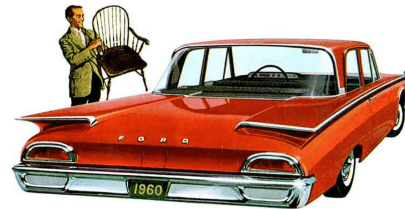

Color: Belcrest Blue

The Ford *Fairlane* models for 1960 are the *lowest-priced* full-size cars you can buy. And like all Fords, your savings only *begin* with their low price. They continue every mile you drive. Save up to \$1.00 each time you fill the gas tank, for Ford's standard engines thrive on regular fuel. Save on aluminized mufflers that normally last *twice* as long as ordinary kinds . . . save on oil changes that now are needed

only each 4,000 miles . . . and save on Ford's Diamond Lustre Finish that never needs waxing. Such features have made lower-priced Fords the sales leader by a margin of nearly 2-1 over competition! And now, while *remaining* lowest priced, these cars have moved up to Fairlane class in size, style, comfort and performance. No wonder they're the *money-savingest* full-size cars you can buy!

Fairlane Town Sedan offers the convenience of a 4-door, the savings of a Fairlane, and it's still one of America's lowest-priced full-size cars. If you want a big 6-passenger car at a modest price—whether for business or family use—this model fills the bill beautifully. Equipped with either the Mileage Maker Six or the new standard Thunderbird 292 V-8, you'll find it one of the thriftiest new models to own.

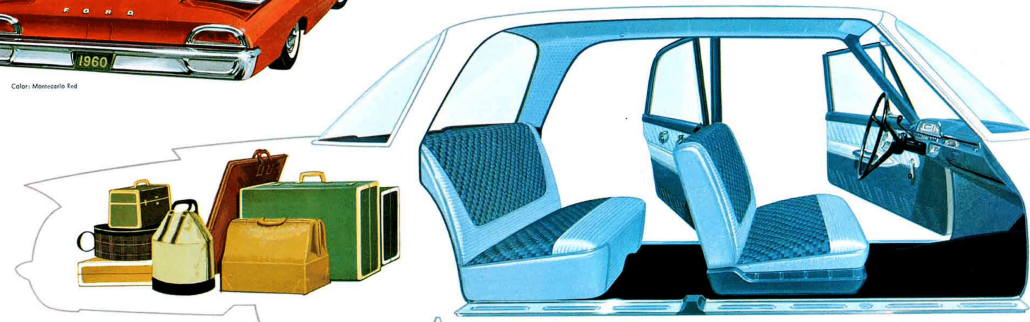

Color: Montecarlo Red

Fairlane Club Sedan (left) is one of the *lowest-priced*, full-size, 2-door family sedans in America. Seating six adults in roomy comfort, this car is designed for families requiring dependable performance within a budget. Its special Fairlane features include "hardtop" styling, made possible by Ford's thin-pillar design and vast picture-window views. This Fairlane is one of the biggest selling models, and it's easy to see why!

Business Sedan brings you all of those features that have made the 1960 Fairlane world famous for economy, yet it meets the needs of businessmen who require easily accessible space for luggage and samples. The space back of the seat is 33" x 64", plus a big trunk that holds 33½-cu. ft. Something else the traveling man will appreciate is the comfortable seat that's *foam padded* at no extra cost. It's adjustable to 11 different positions.

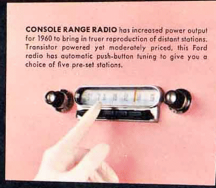

Beautiful as they are, the interiors of Ford's 1960 Fairlane models are mighty practical, too. They resist normal wear and tear in a manner that belies their elegance, and they are surprisingly

resistant to hard usage by small children. Before *any* material can be placed in a Ford interior, it first must meet the most rigid standards in the automobile industry in Ford's own testing laboratory.

60 FORD OPTIONS AND ACCESSORIES

POLAR AIRE CONDITIONER brings coolest comfort no matter how hot the weather. Ford air conditioning is priced lower than on competitive cars. In fact, an air-conditioned Ford costs less than many medium-priced cars without air conditioning. This unit has larger capacity and dehumidifies as it cools for maximum comfort. (Six and V-8's.)

CONSOLE RANGE RADIO has increased power output for 1960 to bring in truer reproduction of distant stations. Transistor powered yet moderately priced, this Ford radio has automatic push-button tuning to give you a choice of five pre-set stations.

REAR BUMPER REFLECTOR AND BACKUP LIGHT are completely new for 1960. Reflector doubles the size of taillight glow. Circular backup lights are mounted in lower back panel, one on each side.

NEW HOOD ORNAMENT adds a modern touch that is the crowning glory of Ford's classic design for 1960. It's made from corrosion-resistant metal to stay bright.

4-WAY MANUAL TILT FRONT SEAT is an easily operated, modestly priced mechanism that gives you a choice of 55 different seat positions. Any driver—tall or short, thin or fat—can be seated comfortably for greater driving ease and safety.

POWER STEERING

POWER BRAKES

SAFETY

Ford's Lifeguard Design saves lives and reduces injuries. For 1960 Ford offers: 1. Lifeguard arm rests fully cushioned with shock-absorbing material. 2. Seat belts help keep you in your seat in case of impact.* 3. Lifeguard Jr. safety locks help prevent "small fry" from accidentally opening a rear door.* 4. Lifeguard Double-Grip door locks for added protection against doors springing open upon impact. 5. Lifeguard sun visors fully cushioned with super shock-absorbing material.* 6. Lifeguard double-swivel shatter-resistant safety mirror swings away if struck. 7. Lifeguard deep-center steering wheel with three equally spaced spokes. 8. Lifeguard cushioning on instrument panel.*

*Optional at modest extra cost

REARVIEW MIRROR is a must for safe driving. Ford offers five types, including an Adjust-O-Ring with special ring visor that helps protect against rain, snow and mud.

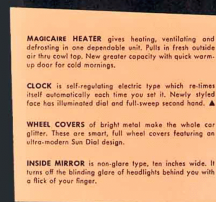

SPORT SPARE WHEEL CARRIER gives your Ford that sophisticated appearance for still greater distinction. It adds an impressive 10 inches to your car's length, leaves more luggage space inside trunk. Decorative tread cover is stainless steel.

SELECTAIRE CONDITIONER gives you complete climate control the year-round with dehumidified cooling, ventilating, heating and defrosting in one compact unit, yet it's priced lower than units of this type on other cars. Capacity has been boosted for 1960 for still faster warm-up or cool-down. (V-8's only.)

VISORED SPOTLIGHT WITH MIRROR gives night-and-day convenience. Visor feature makes it effective in nearly all weather. And it is easily adjusted from inside car.

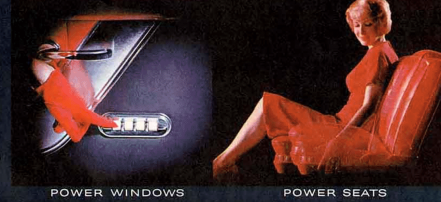

MAGICAIRE HEATER gives heating, ventilating and defrosting in one dependable unit. Pulls in fresh outside air thru cowl top. New greater capacity with quick warm-up door for cold mornings.

CLOCK is self-regulating electric type which re-times itself automatically each time you set it. Newly styled face has illuminated dial and full-sweep second hand. ▲

WHEEL COVERS of bright metal make the whole car glitter. These are smart, full wheel covers featuring an ultra-modern Sun Dial design.

INSIDE MIRROR is non-glare type, ten inches wide. It turns off the blinding glare of headlights behind you with a flick of your finger.

POWER WINDOWS

POWER SEATS

POWER ASSISTS

You'll never use muscle power again when you equip your 1960 Ford with these power assists that do all the work for you: *Master-Guide Power Steering* cuts your parking effort up to 85% and assists you in all your driving. *Swift Sure Power Brakes* with a low pedal are the brakes you love to touch. Stopping takes up to 45% less effort; makes driving in traffic

much easier. *Power-Lift Windows* let you touch the central control button on the driver's door and raise or lower any window. There's a handy button under each window, too. *Power Front Seat* is an infinite position, posture-control seat with synchronized tilting back. All power assists are optional at extra cost.

▲ Standard on Galaxies, Starliner and Sunliner

WINDSHIELD WASHER has twin nozzles activated by a floor foot pedal. Features larger capacity and increased pressure for safer cleaning while driving at high speeds.

ELECTRIC WINDSHIELD WIPERS have positive wiper action which is unaffected by changing engine speed for they are operated by their own electric motor. 2 speeds.

I-REST TINTED GLASS is available for all windows of all models, except the back window of the convertible. It is green tinted, with blue-gray band on upper windshield.

FULL TONE MANUAL RADIO is transistor powered; brings in distant stations with ease. Excellent tone quality. This is a quality radio in every way; moderately priced.

ANTENNA, REAR FIN MOUNTED is swept-back type and comes for either single or dual installation. With dual mountings, only one antenna is connected to radio.

REAR SEAT SPEAKER is a big 6" x 9" speaker with a new grille. Three-way control tunes in front or rear speakers only, or both speakers in synchronization.

DECK LID RELEASE allows driver to unlock rear deck lid without leaving car, simply by pulling the bright-metal release handle on floor. Handy for checking air in spare tire.

PARKING BRAKE SIGNAL provides a warning light that flashes steadily so you can't miss its message that your parking brake has not been properly released.

WHEEL TRIM RING is used with hubcaps to provide a look similar to a full wheel cover. Made entirely of bright metal, it is attached around outer circle of wheel.

ROCKER PANEL TRIM is the new stainless steel ribbed-type. It runs along the rocker panel from the front to the rear wheel opening and provides lower body protection.

REAR FENDER SHIELD is the all-new flush-type that is becoming so popular. It has been designed to conform to the new wheel opening. Skirt is "flipped" along bottom.

FRONT BUMPER GUARDS are all-new, incorporating a vertical, textured black rubber insert. Located over outer extremities of bumper, they protect parking lamps.

REAR BUMPER GUARDS are all-new with a vertical, textured rubber insert. Located on top surface of bumper below each taillight, they give vital protection.

EXHAUST DEFLECTORS are all-new and bright die cast for 1960. Attached directly below the bumper reflector ornament, they add a smart finishing touch to the rear.

EQUA-LOCK DIFFERENTIAL delivers the driving force equally to both rear wheels. Both wheels turn at the same speed instead of one spinning and the other standing still.

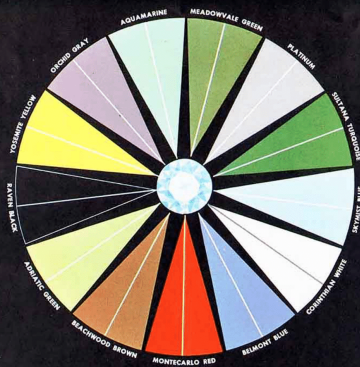

RECIRCULATING HEATER & DEFROSTER provides abundant, economical heating and defrosting at low cost. Recirculates passenger compartment air; has dual outlets.

EXCLUSIVELY FORD...

Diamond Lustre Finish in new vibrant colors

Above all in these beautifully proportioned 1960 Fords is the sparkling Diamond Lustre Finish! Its uniform, glass-like surface requires no "hand-finishing" to bring out its natural, deep-down lustre. And it's so bright and hard and glossy that you won't have to wax it ever!

The superiority of this longer-lasting, baked-on Ford enamel was proved first in laboratory torture tests. It was tested further by desert sun and salt air. Through it all Diamond Lustre Finish proved its toughness. Take your pick of the vibrant colors shown on this color wheel!

More beautiful than ever...Luxury Lounge interiors

The glamorous Luxury Lounge interiors of the 1960 Fords are as durable as they are beautiful. Upholsteries are *nylon*, trimmed with radiant and sof-textured morocco-grain *vinyls*. Because the radiant vinyl is less porous, dirt cannot penetrate easily; it cleans more quickly!

Floor coverings in Galaxie models are color-keyed 100% rayon carpeting throughout. Fairlane 500 models have color-keyed Vinyl-Tex which looks like carpeting, wears like vinyl. Fairlanes have Sof-Tred carpet-textured rubber. Choose the one that suits you best!

From every Point of Value . . .
These are the Finest Fords
of a Lifetime!*

WHY FORD?...

the 60
FORDS

the 60 FORDS here's why give more COMFORT

Chair-high seats, with plenty of room for your hat

Ford's comfortable, chair-high seats are inches higher than those of some competitive cars. You never get the feeling that you're seated on the floor! And Ford seat backs are positioned at a posture-perfect 23-degree angle for real living room comfort. This is a feature you'll appreciate on long drives. And above all, there's plenty of room for your hat.

More stretch-out room . . . no hard spots in center seats

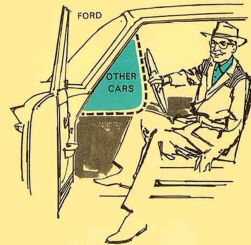

You've got more room to relax in a 1960 Ford. Seats are much wider for full seating comfort of six adult passengers. There's more room for shoulders, more room for hips . . . knees . . . legs . . . feet . . . more room for everything. Ford's tunnel for 1960 is narrower than the tunnel of some competitive cars. This means more foot room . . . more all-around comfort for the passenger seated in the middle. And Ford seats are so thick, so well padded that there's no hard spot in the center, either.

Foam padding gives more comfort . . . costs nothing extra

One thing you'll really appreciate is the comfort of a Ford seat, especially on long trips. It's durable because Ford uses only the best fabrics and vinyls in their eye-pleasing upholstery combinations. It's comfortable because it's foam padded—at no extra cost. And the seat is adjustable to 11 different positions on a track that travels nearly half a foot. Whether you're tall or short, it's easy to find a comfortable setting.

the 60 FORDS here's why give more CONVENIENCE

Ford eliminated the "dogleg" to save your knees

No more bruised knees (or ruined hosiery!) when you get into or out of a 1960 Ford. Ford has eliminated that annoying windshield extension or "dogleg" still found in the pillar design of so many other cars, without sacrificing visibility. Ford gives you far larger doors for more entrance and exit room, too. In short, you don't have to be a human corkscrew to get into or out of a 1960 Ford!

Ford's 2-position door checks hold doors full or 2/3 open

Depend on Ford to be first in bringing you luxury-car features . . . at low Ford prices. 2-position door checks, for example, hold Ford's wide-opening front doors two-thirds or all the way open. It's an especially convenient feature when you've been shopping and have an armload of packages. On 4-door models, Ford's "Automatic Doorman" helps you swing open the rear doors. Still another convenience is a foot-operated parking brake that you set with a touch of your toe.

Ford's trunk allows easy-lift loading

You don't need a jack in order to lift luggage high enough to place it in the trunk of a 1960 Ford. Ford's low-level trunk entrance is only 27 inches above street level to make loading far easier . . . safer, too. And the torsion bar hinged trunk lid is counterbalanced for still greater convenience. Spare tire is out of the way. As for room, you can load in 3 weeks' vacation luggage with ease.

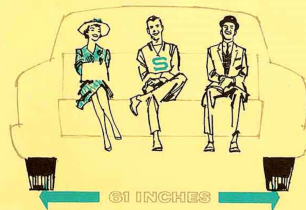

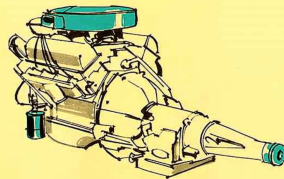

the 60 FORDS here's why mean more SAVINGS

ORDINARY MUFFLER
AFTER 12 MONTHS

FORD MUFFLER
AFTER 12 MONTHS

the 60 FORDS here's why deliver more PERFORMANCE

NEW REAR SUSPENSION

You pay only a low Ford price for big-car size and features

Ford standard engines use regular gas; save up to \$1.00 every tankful

Ford aluminized mufflers normally last twice as long as ordinary kinds

Lively T-bird engines are teamed with four great transmissions

Greater stability with new WIDE-TREAD DESIGN

No squat . . .
No dive with

It is now a legal requirement that every car have its suggested list price posted clearly. This makes it easier than ever to compare low Ford prices with those of other cars in Ford's class. You'll discover that Ford savings begin the moment you buy . . . for Fords are traditionally priced lower. And yet Ford gives you big-car size plus features once found only in luxury-priced cars.

You'll be thankful you chose a 1960 Ford every time you pull up to a gasoline pump. All Ford standard engines, Six or Thunderbird V-8, thrive on regular fuel. You get premium performance without paying a premium price; save up to \$1.00 on every tankful. But that's not all. Ford's new 2-stage Full-Flow oil filter (standard equipment) lets you go 4000 miles between oil changes, too. You save and save!

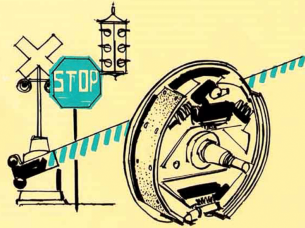

Put an end to the nuisance and expense of frequent muffler replacement. The aluminized mufflers on 1960 Fords normally last about twice as long as ordinary mufflers used on other cars. Other Ford savings include a 66-plate battery (instead of the usual 54) in an exclusive mounting designed to prevent corrosion. And Ford's Diamond Lustre Finish stays beautiful without waxing ever!

Take your pick of great Thunderbird V-8 engines! Or choose the thrifty Mileage Maker Six. The V-8's range from the Thunderbird 292 V-8 right on up to the Thunderbird 352 Special V-8 with 4 barrel carburetion—two for normal driving plus two in reserve for breath-taking GO! Select the transmission that's best for your driving: Fordomatic, Cruise-O-Matic, Overdrive or 3-Speed.

All 1960 Fords now give you the Thunderbird's own kind of road-hugging ride with their new Wide-Tread Design. Both front and rear wheels now are five feet apart. New rear leaf springs are five feet long. You get a 5 x 5 ride! You get better roadability, steadier control and a new feeling of security on curves. For the first time here's a car that corners, rides and handles like the Thunderbird—at low Ford prices!

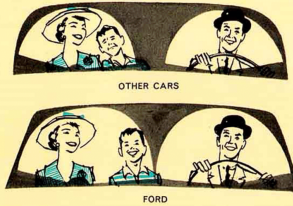

Ford gives you both anti-dive control and anti-squat control, too. Softer rear leaf springs are five feet long. With rear axle located well forward from center of springs, you get a new levelized, variable-rate rear suspension that dampens out bumps and keeps your ride far smoother than is ever possible with coil-type rear springs.

the **60 FORDS** here's why mean more **SAFETY**

Truck Size Brakes are 25% larger; biggest in Ford's field

You get stopping power to match your GO power in a 1960 Ford. Brakes are Truck Size with 25% more brake lining than before! They are the biggest brakes in the low-price field; operate with very little pedal pressure. Brake drums are wider, heavier, with cooling grooves to dissipate heat faster. Front brakes have better air circulation. As a result, these new Ford brakes have greater resistance to "fade out" on emergency stops . . . last far longer.

Better visibility with improved wiper pattern; more safety glass

Up to 31% more safety glass area plus Ford's new lower-angle hood-and-fender design combine to give you the best visibility ever in the 1960 Fords. For example, these features let you enjoy 55% greater sky-to-road visibility through the new compound windshield! And yet it's so designed as to shield you from heat and glare. Wiper blade length has been increased to 15 inches, too, so that the middle passenger now has excellent visibility from the front seat.

OTHER CARS

FORD

Safety-Girder provides all-around protection for all passengers

Safety is built in when you drive a 1960 Ford. It has a Wide-Contoured, safety-type frame—now 25% stronger—that surrounds the passenger compartment with a rugged ring of steel. It is safer by far than the X-type frames used on some other cars in Ford's field. In a Ford all six passengers ride within the massive side rails for extra protection in case of side impact. Insist on this added Ford protection.
